

Finally, the Amendment filed on September 9, 2002, is being resubmitted as this Supplemental Amendment. This Supplemental Amendment identifies all of the changes made to the specification in the September 9th amendment as well as the changes that have been made to the Specification since that submission. Please reconsider the rejections of the claims in light of the following amendments and arguments, and allow the pending claims.

In the Specification:

Please replace the specification with the attached substitute specification filed pursuant 37 C.F.R. § 1.125(a). The substitute specification incorporates the following amendments to the original specification:

At page 1, the title of the invention, the word --- Docosahexaenoic --- replaces the word "Docosahexanoic" of the original specification;

At page 7, line 5, the phrase --- 20 mg/100 kcal --- replaces the phrase "10 mg/kcal" of the original specification ;

At page 9, line 17, the word --- affect --- replaces the word "effect" of the original specification;

At page 12, line 28, the word --- Investigator --- replaces the word "investigator" of the original specification;

At page 12, line 29, the phrase --- Investigator will indicate: --- replaces the phrase "investigator will indicate whether:" of the original specification;

At page 17, line 10, the word --- an --- replaces the word "a" of the original specification;
